

Flushing Cache on Different Browsers

Firefox 6 and 7:

- From the "Options" menu, select the "Advanced" tab.
- Click on the "Clear Now" button.
- Click on "OK" to close the window.

Internet Explorer 5 and 6:

- From the "Tools" menu, select "Internet Options".
- On the "General" tab in the "Temporary Internet Files" section, click on "Delete Files" and then click "Okay" on the confirmation pop-up.
- Click "Okay" to close the "Internet Options" window.

Internet Explorer 7, 8, and 9:

- From the "Tools" menu, select "Internet Options".
- On the "General" tab in the "Browsing history" section, click on "Delete" and then click "Delete" on the confirmation pop-up.
- Click "Okay" to close the "Internet Options" window.

IE for Macintosh:

- Choose Edit from the menu at the top.
- Select Preferences.
- From the table that opens select 'Advanced'.
- From the area named Cache hit the button that says 'Empty Now'.

Apple Macintosh Safari:

- From the tile bar at the top hit the Safari Link.
- Choose Empty Cache from the drop down menu.
- Select Empty from the safari warning box.

Chrome 10.0 or above

- Go to Chrome "options", then select "Under the Hood"
- In the Privacy section, click "Clear Browsing Data"
